International Journal of Magnetic Resonance Imaging

International Journal of Magnetic Resonance Imaging (*Int JMRI*) is a quarterly multidisciplinary journal devoted to the prompt publication of original research articles, technological and instrumental notes, case reports, short communications, educational papers and the state-of-the-art reviews dealing with all aspects of development and application of magnetic resonance imaging in basic and clinical sciences. The Journal aims to provide an international and unique source of information to clinical radiologists, medical physicists, radiology trainees, biochemists and MR technologists. Submission of related pathologic, surgical and clinical material is encouraged. A separate section contains abstracts of selected papers from the current literature. Reviews of books or monographs and announcements about national or international associations and conferences related to magnetic resonance imaging are published.
